

# C-130 E2H ECS<sup>®</sup> Flight Station Upgrade

P/N: LE21001-101

## C-130 E2H ECS<sup>®</sup> Flight Station Upgrade

### Features and Benefits

- » Meets current flight station avionic cooling requirements
- » Improved reliability
- » Affordable, easy installation
- » Increased flight station cooling capacity
- » Increased output: Legacy 30 PPM Vs. Upgraded 70 PPM=230% increase
- » Simplified logistics:  
Components supported by the DOD
- » Utilizes C-130H Honeywell refrigeration unit  
P/N 2200440-7-3, NSN 1660-01-275-5646
- » Improved safety: includes four engine pressure regulating bleed air shut off valves, maintaining a bleed air manifold pressure of 50 psi during normal operations
- » ECS system interconnect between the flight station and cargo compartment

New ECS Refrigeration Unit

Completed Installation

The C-130 E2H ECS<sup>®</sup> Flight Station Upgrade replaces the legacy C-130 30 PPM ECS System. The upgrade applies to Legacy: C-130B/E/H and Variants: C-130K, C-130R. Installation requires a minimum of four technicians and 660 man hours.

### Critical Issues

- » Outdated 1950s Technology
- » Heavy Maintenance
- » High Failure Rate
- » Low System Output
